Remarks

The amendments to the specification are to clarify that Samples 1-4, listed in Tables 1 and 2, were made by the process disclosed in the present application and are not commercial products. The commercial products are identified by their trade names. It would be clear to one skilled in the art that the characterization that Samples 1-4 were made by the process disclosed in the present application flows from the information in the specification, including Tables 1 and 2. Thus, no new subject matter is added.

A substitute page 39, as amended, is included for convenience.

The Examiner is invited to telephone Applicant's attorney (612-373-6968) to facilitate prosecution of this application.

Respectfully submitted,  
DAVID J. BAER ET AL.
